

These materials DO NOT require a USDA APHIS VS permit as per USDA Guideline 1120 - Cell Cultures/Lines, Recombinant Cell Cultures/Lines, and Their Products (for in vitro use)

Package description:

1. The enclosed materials are non-hazardous, non-infectious, recombinant DNA derived from animal cell lines that are not livestock or avian species. This material is shipped in a non-hazardous preservative that permanently inactivates pathogens (viruses, bacteria, fungi, & parasites) and stabilizes DNA.
2. These materials are for *in vitro* use only (DNA sequencing).
3. The materials have not been exposed to livestock or avian disease agents exotic to the United States. They have not been produced in a facility where work with exotic viruses affecting livestock and avians is conducted.
4. These materials are recombinant DNA. They do not produce antigens or contain genes of livestock or avian disease agents. They do not contain genes or express products of exotic livestock or poultry disease agents. These materials do not produce monoclonal antibodies directed against livestock or avian disease agents.
5. The shipper is the manufacturer.
